DETAILED ACTION

Note: The Examiner for the present application has changed.

Terminal Disclaimer

1. The terminal disclaimer filed on September 17, 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 6,661,453 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. **Claims 23 – 31 and 33 – 41** (now renumbered 1 – 18, respectively) are allowed.
3. The following is an Examiner's statement of reasons for allowance:

The closest prior art discloses a device including an image sensor configured to repeatedly receive a light from an object and to generate images of the object; a differential image generating unit configured to generate a differential image from at least two images; a detector configured to detect a change cycle or an intensity of an external light; an evaluation unit configured to evaluate an influence of the external light and to derive an optimal timing in which a minimum influence of the external light is attained; and a controller configured to control a timing of receiving the light of the image sensor depending upon the optimal timing derived by said evaluation unit;

However, the closest prior art does not teach or fairly suggest wherein said controller repeatedly synchronizes a term of two timings with the change cycle of the external light by shifting the term into the change cycle by a unit of predetermined phase difference.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
